KEYWORD: Spear / Hunting accessory / CLASS: Weapon / Hunting / ?.

Object description: Spear of palm wood decorated with string of feathers. The spear has carved barbs at the tip. There are two bunches of feathers tied along the edge of a netted string. The feathers are mainly white with five long yellow feathers and tassels of string hanging down. The string is tied to the spear in three places. The tail end of the spear has a feather tied on with string. [MJD 11/12/2012]

Accession Book Entry - Rev. W. Abbot 1 Cromford Street, Leicester - Specimens collected by him at Collingwood Bay, British New Guinea, when attached to the Mission there, see former list purchased through Mr Gerard [sic - spelt Gerrard] 1901 [see 1901.65.1 - 44]: - Long pig-killing spear, with feathers for decorating it ... PR cash account £2-10-0 July 1

Added Accession Book Entry - This object was physically numbered by Lynne Williamson Sue's project

Written on object - PIG-KILLING SPEAR COLLINGWOOD BAY, N. GUINEA. W. Abbot coll. Purch. 1902 with feather decoration [MJD 11/12/2012]

Other information: This object was not found physically numbered by Lynne Williamson, although the feather work had been protected in a plastic bag. [MJD 11/12/2012]

Accession Number **1903.43.2**

KEYWORD: Model / Toy / Shield / CLASS: Model / Toy & Game / Weapon / Children / ?.

Object description: Shield made from a thin sheet of wood that is covered on the back and front with horizontal bands of split rattan or cane. This is kept in place by plaited rattan or cane running along the sides and down the centre at the front. The horizontal handle on the back of the shield is made of a piece of bent rattan or cane. Leaf-shaped with symmetrical sides forming a point at one end. At the other end the rattan is damaged leaving the wood sheet underneath exposed, revealing an irregular edge. The shape of the edge of the sheet at this end seems to be the result of damage and wear, presumably this was once a straight flat edge that was fully covered by the rattan. [ZM 07/04/2006]

Accession Book Entry - Jan Rev. W. Abbot - Set of miniature weapons etc used by native children in war game, Collingwood Bay, British New Guinea viz: - Wooden shield bound round with cane ... PR cheque 30/-

Written on object - TOY SHIELD COLLINGWOOD BAY NEW GUINEA Abbot coll. Purch. 1903 [ZM 29/11/2005]

Display history: On permanent display in case L.10.B (Miniature Weapons and Play) with the following caption written in 2007 - MELANESIA, PAPUA NEW GUINEA, COLLINGWOOD BAY. Wooden shield bound with rattan said to be used by children for war games. Collected by Reverend W. Abbot and purchased from him in 1903; 1903.43.2 [ZM 14/11/2007]

Research notes: For an illustration and description of this style of shield from the Collingwood Bay area see pp 208-211 of *Shields of*

Melanesia, edited by Harry Beran and Barry Craig (Honolulu: University of Hawaii Press, 2005). On page 209 Beran notes that some publications picture this style of shield with the pointed end at the top but argues that photographic evidence, descriptions of use, and the positioning of the handle closer to the straight end, all suggest these shields were actually held with the pointed end going downwards. The known examples of this style of shield that are mentioned are all slightly bigger and heavier than 1903.43.2 suggesting that this example was made as a toy or model. [ZM 31/08/2006]
